WORK EXPERIENCE

Web Developer, IBC Computers Brantford (SecurIBC), Brantford, Canada **01/2025 – Present**

- Delivered 12+ end-to-end WordPress sites, managing the full lifecycle from Figma design to final deployment.
- Developed high-performing landing pages optimized for lead generation and integrated with analytics tools.
- Designed high-fidelity Figma mockups for 50% of projects, ensuring a pixel-perfect transition to responsive code.
- Engineered custom data structures (CPT, ACF) to enable intuitive content management for clients.
- Used my QA experience to deliver websites and test them across different browsers.
- Scaled organic search visibility from zero to measurable growth by executing full-cycle SEO strategies.
- Optimized site performance and accessibility, improving user engagement and SEO rankings.

Volunteer Web Developer, BL's Little Free Pantries, Brantford, Canada **02/2024 – 02/2025**

- Designed and developed the organization's website using WordPress.
- Implemented SEO strategies to enhance the website's visibility.
- Managed ongoing website updates and maintenance to ensure optimal performance and user experience.

Frontend developer, iResources, Estonia **3/2017 – 12/2024**

- Developing engaging and mobile-friendly websites using WordPress / Elementor, Prestashop, React and React Native.

- Customizing Elementor templates according to client specifications.
- Collaborating with designers to transform UI/UX into high-quality HTML / CSS / JavaScript code.
- Performing comprehensive testing to ensure proper website functionality across various environments.

Frontend developer, Flyaps, Ukraine

12/2014 – 3/2017

- Translated Photoshop designs into pixel-perfect HTML / CSS / JS layouts.
- Implemented responsive design solutions.
- Collaborated with cross-functional teams to gather website requirements and understand customer preferences
- Regularly communicated project updates and integrated client feedback.

Earlier QA Experience, Ukraine 2008 – 2013

- Performed manual and automated software testing using test plans, Selenium, and structured QA processes.
- Led a QA team of 5 people and helped improve testing efficiency through automation and SCRUM-based collaboration.
- Applied strong QA practices to improve release quality, cross-functional communication, and delivery reliability.
